Affected QGIS version:	3.4.4	**Regression?:**	Yes
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	29015

Description

I've noticed if I leave my map for a while and come back to it that my PostGIS connections appear to be dropped and I can't make edits or add new layers from a DB. I'm not sure when this behavior started but at least since 3.0. I found an old bug report from many years ago indicating that this problem had been fixed. Did this get dropped in the transition?

History

#1 - 2019-02-08 12:46 AM - Spencer Gardner

Meant to link the old bug report #1810

#2 - 2019-02-08 07:30 PM - Spencer Gardner

- Status changed from Open to Closed

Just noticed the recent and much more thorough report #20170
