

QGIS Application - Feature request #21209
Random marker position for marker line style

2019-02-08 02:59 PM - Julien Monticolo

Status:	Open	Resolution: Copied to github as #: 29027
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
For a marker style in QGIS, for the marker position, we have the choice between :		
- interval - vertex - lastvertex - firstvertex - centerpoint - curvepoint		
Is-it possible to add a random position with a parameter (sort of density ?) ?
