

QGIS Application - Bug report #21230

QGIS master crash when using spatial indices

2019-02-11 03:27 PM - Pedro Venâncio

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Windows Package	
Affected QGIS version:	3.5(master)	Regression?: Yes
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 29048
Description		
<p>To reproduce:</p> <ol style="list-style-type: none">1. Load a point layer (postgis, shp, ...)2. Properties -> Symbology3. Point Displacement OR Point Cluster4. Apply5. QGIS Crashed <p>QGIS Info</p> <p>QGIS Version: 3.5.0-Master</p> <p>QGIS code revision: 29d4496452</p> <p>Compiled against Qt: 5.11.2</p> <p>Running against Qt: 5.11.2</p> <p>Compiled against GDAL: 2.4.0</p> <p>Running against GDAL: 2.4.0</p> <p>System Info</p> <p>CPU Type: x86_64</p> <p>Kernel Type: winnt</p> <p>Kernel Version: 10.0.17763</p> <p>This does not happened in code revision daab33c4d7 (3.5.0-84 in OSGeo4W).</p> <p>In 3.4.4 this also does not happen.</p>		

History

#1 - 2019-02-11 06:00 PM - Giovanni Manghi

Confirmed here, only master.

#2 - 2019-02-12 01:13 AM - Nyal Dawson

no crash here - can you post data to reproduce?

#3 - 2019-02-12 01:13 AM - Nyal Dawson

- Status changed from Open to Feedback

#4 - 2019-02-12 05:15 AM - Nyall Dawson

- Category changed from Symbology to Windows Package

- Status changed from Feedback to Open

- Subject changed from QGIS master crash with Point Displacement or Point Cluster Symbology to QGIS master crash when using spatial indices

Actually the issue is ANYTHING which uses a spatial index -- snapping/vertex tool is also affected.

This is likely a consequence of the recent upgrade to libspatialindex 1.9

#5 - 2019-02-12 10:22 AM - Pedro Venâncio

- File sample.zip added

Hi Nyall,

I was checking OSGeo4W and it is still using libspatialindex 1.8.5-1.

And being a problem with libspatialindex package, should not also affect 3.4.4?

I see that after start editing the point layer, with Add feature tool, Vertex tool, Move feature, just moving the cursor over canvas, QGIS shows an Exception window with "unknown exception" message.

I attach a sample dataset.

| Exception window with "unknown exception" message.

I filed #21237 yesterday about this issue.

#7 - 2019-02-13 07:52 PM - Pedro Venâncio

- Status changed from Open to Closed

It is fixed now!

Thanks!

#8 - 2019-02-13 07:54 PM - Giovanni Manghi

- Resolution set to fixed/implemented
