

## QGIS Application - Bug report #21261

### Expression in text element not working with transparency

2019-02-14 02:01 AM - Holger Eberhardt

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Map Composer/Printing	
<b>Affected QGIS version:</b>	3.4.4	<b>Regression?:</b> No
<b>Operating System:</b>	Windows 10 64	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 29079
<b>Description</b>		
An expression in a text field in a layout is not updated, as soon as opacity is set to something other than 100%.		

#### History

Sorry, my first description was probably not enough.

"not updated" means, that the text field is not changed, when going through the pages of an atlas.

So with opacity 100% everything is ok - text field is correctly updated according to the actual atlas page.

With other value for opacity this does not work anymore.

Greetings

Holger Eberhardt

Do you see this in outputs too, or only in the designer?

Oh yeah, you are right. The output (PDF) is ok! I didn't export it yesterday, so I didn't realize that.

Makes this bug quite a bit less important. But it cost me a lot of time, to find out, what was going wrong, because for a long time I thought, that the problem was me doing somethng wrong.
