

QGIS Application - Bug report #21265

Qgis 3.4.4: the version number has not been updated. It shows 3.4.3

2019-02-14 09:30 AM - philippe Clastre

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Windows Package	
Affected QGIS version:	3.4.4	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 29083
Description I used to have a 3.4.3 Qgis version installed on my W10 desktop I installed the last Qgis 3.4.4 over it (the process uninstalled the previous 3.4.3) When i start the fresh version, i can see the yellow sign at the top of the map region explaining that there is a newer version (3.4.4) If i check in the Help panel, the version shown is 3.4.3 with built commit:2f64a3c4e7		

History

- Status changed from Open to Feedback

Where from exactly?

#2 - 2019-02-14 02:10 PM - philippe Clastre

It's a french version, so i try to translate ...

I click on the help menu, then in the "about" sub-menu. In the popup, the first line reports:

Version de QGIS 3.4.3-Madeira Révision du code 2f64a3c4e7

Hope this is the answer to your question

Not really. 32bit or 64bit? Standalone installer or OSGeo4W installer?

#4 - 2019-02-25 09:04 AM - philippe Clastre

64 bits, standalone installer

#5 - 2019-02-25 09:11 AM - Jürgen Fischer

- *Description updated*

#6 - 2019-02-25 09:45 AM - Jürgen Fischer

- *Resolution set to not reproducible*

- *Category changed from Build/Install to Windows Package*

- *Status changed from Feedback to Closed*

Works fine for me using https://qgis.org/downloads/QGIS-OSGeo4W-3.4.4-1-Setup-x86_64.exe
