Description

I tried to display a photo with hyperlink. I set the layer Attributes From properties as follow: **Widget Type**: Attachment, **Storage Mode**: File paths, **Display button to open file dialog marked**, **Use hyperlink for document (read-only)** marked and **Integrated Document Viewer Type**: Image.

When I tried to add the hyperlink to the shapefile from the Attribute Table , the QGIS is crashing

I tried to change setting, and worked from anther PC, it still crushing.

The log data is attached in a word file, it also listed in StackExchange [[
