Category:	GUI			
Affected QGIS version:		**Regression?:**	No	
Operating System:	All	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	12195	

Description

I have users that suggested having a "unselect all" button could be useful: sometimes
analyses are run, and it can be boring running them only to discover that we have one
of the layers with a selection applied, and we ran the analysis on the selection only.
Going through all the layers and unselecting each require 2-3 clicks for each layer,
so it's a bit cumbersome.
