

QGIS Application - Bug report #21368

Fails to build with GUI disabled

2019-02-25 05:46 AM - Tom Palan

Status:	Open	
Priority:	Normal	
Assignee:	Alessandro Pasotti	
Category:	Build/Install	
Affected QGIS version:	3.4.4	Regression?: No
Operating System:	Debian Stretch 64	Easy fix?: No
Pull Request or Patch applied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29185

Description

For building the QGIS server without Desktop app the following cmake command works:

```
cmake -G Ninja \  
-DCMAKE_VERBOSE_MAKEFILE=1 \  
-DCMAKE_INSTALL_PREFIX=/usr \  
-DBINDINGS_GLOBAL_INSTALL=TRUE \  
-DPEDANTIC=TRUE \  
-DSERVER_SKIP_ECW=TRUE \  
-DQGIS_CGIBIN_SUBDIR=/usr/lib/cgi-bin \  
-DWITH_APIDOC=TRUE \  
-DGENERATE_QHP=TRUE \  
-DWITH_CUSTOM_WIDGETS=FALSE \  
-DWITH_GLOBE=FALSE \  
-DWITH_SERVER=TRUE \  
-DWITH_SERVER_PLUGINS=TRUE \  
-DWITH_QWTPOLAR=FALSE \  
-DWITH_DESKTOP=FALSE \  
-DWITH_GUI=TRUE \  
-DDOXYGEN_ON_DEMAND=TRUE ..
```

But when disabling the GUI (WITH_GUI=FALSE), the build fails with error message:

ninja: error:

'../python/plugins/db_manager/db_plugins/postgis/plugins/versioning/pyg

ui', needed by

'python/plugins/db_manager/db_plugins/postgis/plugins/versioning/ui_Dlg

Versioning.py', missing and no known rule to make it
