

QGIS Application - Feature request #2141

Avoid viewing editin vertexes for all the the features in the view

2009-11-23 03:42 AM - Giovanni Allegri

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Digitising	
Pull Request or Patch supplied:		Resolution: invalid
Easy fix?:	No	Copied to github as #: 12201
Description		
<p>I find a bit strange the behaviour of QGis in editing mode. I would expect to see the editing vertexes/symbols visualized only for selected features, and not for all the visibile features. I had to edit some polygons for a polygonal layer with about 115000 geometries. Toggling the edit made all the polygons vertexes turned on, asking for a long and heavy overhead for QGis.</p> <p>Shouldn't it be better to follow the behaviour of other softwares (eg Gvsig, [[ArcGIS]]) in which the editable vertexes appear only for the features selected by the user?</p> <p>giovanni</p>

#1 - 2009-11-23 04:26 AM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Open to Closed

The option is available in the qgis "options" menu, "digitising" section.
