QGIS Application - Feature request #21417

For polygon editing, expose the option "avoid intersection" also in the simple snapping configuration

Easy fix?:	No	**Copied to github as #:**	29234

Description

When digitizing adjacent polygons, the "avoid intersection" option is a tremendous help.

Therefore, it would be great to have it also in the "non advanced" snapping configuration.
Could simply be added at the end after "Snapping on intersection".

History

#1 - 2019-03-01 08:37 PM - Giovanni Manghi

- Easy fix? set to No

- Category changed from Any to Digitising

- Project changed from QGIS Redmine (QGIS bug tracker) to QGIS Application

I agree.
