

QGIS Application - Bug report #21448

QGIS 3.6 can't open .qgz project file created on 3.4.4

2019-03-02 11:53 AM - Tim Makins

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	Project Loading/Saving	
Affected QGIS version:	3.6.0	Regression?: No
Operating System:	Win 7 Pro 64bit	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29265
Description I upgraded from 3.4.4.1 to 3.6.0.1. When I clicked on an existing .qgz file, I was informed that it was from an older version, and that it might make it unusable for older versions, but there appeared to be no way to actually open it.		

History

#1 - 2019-03-02 01:12 PM - Giovanni Manghi

- Status changed from Open to Feedback
- Subject changed from QGIS 3.6 would not open older .qgz Project Filke to QGIS 3.6 can't open .qgz project file created on 3.4.4

Any chance you can attach the project?

#2 - 2019-03-02 01:34 PM - Tim Makins

- File ITUZ 50m.qgz added

Hi Giovanni - I have attached the project file. It did open in v3.4.4.1, but won't any longer, once I tried to open it in v3.6.0.1. It wouldn't open in v3.6.0.1 either.
