QGIS Application - Bug report #2145
Cannot Open Flightgear Airport file

2009-11-24 10:59 PM - durga -

Status:	Closed			
Priority:	Low			
Assignee:	nobody -			
Category:	Vectors			
Affected QGIS version:			**Regression?:**	No
Operating System:	Windows		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	invalid
Crashes QGIS or corrupts data:			**Copied to github as #:**	12205

Description

QGIS Mimas crashes when we try to open Airport.dat file in Flightgear format.It works fine with fix.dat,navaid.dat and other files in the same format.

History

#1 - 2009-11-25 12:08 AM - Giovanni Manghi

If Qgis opens other files in the same format, it could be that your "airport.dat" file is not correctly formed...

#2 - 2009-11-28 10:44 AM - Paolo Cavallini

Where is the file? Can you test with a newer version? Can you report what the console says before the crash?

#3 - 2009-12-08 10:12 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed

closing for lack of feedback. Reopen if necessary and/or post the problematic file.
