- Resolution set to invalid
- Status changed from Open to Closed

QGIS 2.18 is EOL. Install 3.4 or 3.6 (but there's also a qgis-218 package available if you uncheck "hide obsolete")

No need for hide obsolete :

Check qgis-ltr for 3.4.5-1 (don't try 2.18 option here)

Check qgis218 for 2.18.28-2

See linked image for more visual information.

Really useful for QGIS 2 to QGIS 3 migration.
