<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> duplicate
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 12207
<b>Description</b>		
<p>Hi</p> <p>QGIS crashes when I want to open vector of a location in tab Browser in Grass Tools.</p> <p>1.) Open Grass tools</p> <p>2.) Click on tab Browser</p> <p>3.) Click on one of your Locations. Now you see vector and raster.</p> <p>4.) Try to open vector by clicking on the plus.</p> <p>5.) QGIS crashes</p> <p>Happens with QGIS 1.3.0 revision as well as with QGIS 1.4.0 revision 12143</p> <p>greetz</p> <p>Michael</p>		

History

#1 - 2009-11-25 12:13 AM - Giovanni Manghi

I have seen this before, but just when for some reason the an operation on a vector goes wrong, for example when I imported a vector with v.in.ogr and for some other reason qgis closed during the process (my pc shut down).

A workaround is to open the mapset folder, enter "vector" and delete the folder containing the problematic vector (I know that is not the right way to delete layers from a mapset, but at least I got my mapset back).

Nevertheless this (the crash) should not happen, so it would be useful if you can post the error message; just launch qgis from the terminal and paste here the error when qgis crashes. Thanks.

#2 - 2009-11-25 12:21 AM - bjpfei -

I've added the errors produced by backtrace in gdb

#3 - 2009-11-29 05:39 AM - Giovanni Manghi

- Resolution set to duplicate
- Status changed from Open to Closed

sorry, I just noticed that this is duplicate of #2003
