

QGIS Application - Bug report #215

svg export doesn't do text

2006-07-31 04:24 AM - Gavin Macaulay -

Status:	Closed	
Priority:	Low	
Assignee:	Steven Bell -	
Category:		
Affected QGIS version:		Regression?: No
Operating System: All		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10274
Description		
<p>The save as svg option in the map composer doesn't include any of the text from the composer items (e.g., legend text, a label, and even text labels on map features).</p> <p>This looks like a problem with Qt's support for svg rather than a qgis problem.</p>		

History

#1 - 2007-07-21 09:20 PM - Tim Sutton

Changed to minor under the following scheme:

- blocker - bugs that should block the release. Since we are going to release pretty much 'come what may' I would like no bugs
- allocated to this category without consultation with me and / or PSC
- critical - bugs that cause the application to crash or corrupt data
- major - application features that do not function at all
- **minor** - features that function but imperfectly e.g. labels placing incorrectly
- trivial - gui useability issues or small issues with the documentation, install notes etc.

Reassigned to Steven Bell who is working on composer stuff lately

#2 - 2008-05-15 06:58 AM - Steven Bell -

- *Resolution set to fixed*
- *Status changed from Open to Closed*

This appears to be fixed with the switch to QSvgGenerator.

#3 - 2009-08-22 12:54 AM - Anonymous

Milestone Version 0.9.2 deleted
