QGIS Application - Bug report #215 svg export doesn't do text

2006-07-31 04:24 AM - Gavin Macaulay -

Status: Closed Priority: Low

Assignee: Steven Bell -

Category:

Affected QGIS version:

Operating System: All

Pull Request or Patch supplied:

Crashes QGIS or corrupts data:

Regression?: No

Resolution: fixed

Copied to github as #: 10274

Description

The save as svg option in the map composer doesn't include any of the text from the composer items (e.g., legend text, a label, and even text labels on map features).

This looks like a problem with Qt's support for svg rather than a qgis problem.

History

#1 - 2007-07-21 09:20 PM - Tim Sutton

Changed to minor under the following scheme:

- blocker bugs that should block the release. Since we are going to release pretty much 'come what may' I would like no bugs
- allocated to this category without consultation with me and / or PSC
- critical bugs that cause the application to crash or corrupt data
- major application features that do not function at all
- minor features that function but imerfectly e.g. labels placing incorrectly
- trivial gui useability issues or small issues with the documentation, install notes etc.

Reassigned to Steven Bell who is working on composer stuff lately

#2 - 2008-05-15 06:58 AM - Steven Bell -

- Resolution set to fixed
- Status changed from Open to Closed

This appears to be fixed with the switch to QSvgGenerator.

#3 - 2009-08-22 12:54 AM - Anonymous

Milestone Version 0.9.2 deleted
