

## QGIS Application - Bug report #21508

### Saving Layer Theme discards subgroup selection

2019-03-07 08:53 AM - Charl Jooste

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Symbology	
<b>Affected QGIS version:</b>	3.6.0	<b>Regression?:</b> No
<b>Operating System:</b>	Windows 10	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 29325
<b>Description</b>		
<p>When you save layer themes have groups with layers that have been selectively activated within subgroups.</p> <p>If you save the layer theme and load it again, all the selections in a subgroup will be switched off if the parent group was switched off.</p> <p>It should save the state of each layer in the subgroups (or nested groups if applicable) as well.</p>
