

QGIS Application - Bug report #21526

QGIS crashed on close

2019-03-08 03:46 PM - Peet Whittaker

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Unknown	
Affected QGIS version:	3.4.5	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 29342

Description

User Feedback

QGIS crashed when closing the application (via the Close Window button)

Report Details

- Priority changed from Normal to High
- Status changed from Open to Feedback

Try create a new QGIS profile, then try again without installing any 3rd party plugins.

Unfortunately the problem isn't reliably reproducible - it seems to occur at random. For example, I just opened a new instance of QGIS (using my normal profile w/ plugins), added a couple of raster/vector layers and then closed QGIS without issue.

I will do as you suggest, but I rely on some of the 3rd party plugins for my work, so I won't be able to do too much testing.

the fact is that there are several QGIS 3rd party plugins that are not well written and may cause any sort of issues.

We must separate what are the QGIS core issues and the ones caused by 3rd party tools.
