

QGIS Application - Bug report #21550

Crashing every time I close program

2019-03-11 05:04 AM - Craig Fildes

Status: Closed	
Priority: High	
Assignee:	
Category: Unknown	
Affected QGIS version: 3.6.0	Regression?: No
Operating System: Windows 10	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: Yes	Copied to github as #: 29366
Description	
User Feedback	
This happens every time I close QGIS - works perfectly otherwise

History

#1 - 2019-03-11 11:36 AM - Giovanni Manghi

- Category changed from Windows Package to Unknown
- Status changed from Open to Feedback
- Assignee deleted (Jürgen Fischer)

- Priority changed from Normal to High

Please try with a new/clean profile (no 3rd party plugins installed).

#2 - 2019-03-13 01:48 PM - Hadrien Bois

I also had this problem multiple times. Qgis crashed when I quit. It would not always crash.

Recently, it completely stopped loading the core plugin Processing when I opened QGIS, whether I opened 3.6.0 or 3.4.5 LTR... no mater how many times I tried quitting and reopening.

Creating a new profile fixes this (but now I have to re-customize my profile...).

#3 - 2019-03-13 01:52 PM - Giovanni Manghi

| Creating a new profile fixes this (but now I have to re-customize my profile...).

the important point here is if the profile starts give problems again after some time.

#4 - 2019-03-13 02:21 PM - Hadrien Bois

Well this is on a new profile I created (I only moved the Browse window underneath the layers window and added a custom coordinates format in Map Grid Properties - Draw Coordinates - Format - Custom (expression and function editor) - no installed plugins).

Qgis 3.6.0 crashed when I closed it. The processing default core plugin is still here, so for now it does not seem to impact me.
