

QGIS Application - Bug report #21562

opening filesystem dialogs very slow on MacOS

2019-03-12 08:44 AM - Gavin Fleming

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	mac_os_specific	
Affected QGIS version:	3.4.5	Regression?: No
Operating System:	macOS	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29378
Description		
<p>For all 3.x versions to date (and in different user profiles) any action in QGIS that opens a system dialog (e.g. saving or opening any file) results in a long wait for the dialog to completely render and populate and for the cursor to become responsive again.</p> <p>Nothing else on the system is slow and it doesn't happen with 2.18 so it's definitely a 3.x phenomenon.</p>

- Status changed from Open to Feedback

Try with the Lutra integrated installer - it doesn't have this issue.

#2 - 2019-03-12 10:28 AM - Giovanni Manghi

- Operating System changed from OSX to macOS

- Category changed from OsX UI to mac_os_specific

#3 - 2019-03-31 10:28 PM - Garth Fletcher

On Mac OS X 10.12.6 I encounter no delays on File Save or File Open dialogs with QGIS version 3.6.0-Noosa.
