OSM plugin: Python error on moving line

2009-11-28 05:15 AM - Donkagen2 -

Status:	Closed	
Priority:	Low	
Assignee:	Martin Dobias	
Category:	Python plugins	
Affected QGIS version:	master	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed
Crashes QGIS or corrupts data:	No	Copied to github as #: 12218
Description		
While trying to move a line feature, a Python error always occurs: Traceback (most recent call last): File "C:/OSGeo4W/apps/qgis-dev/.python/plugins\osm\map_tools\OsmMoveMT.py", line 485, in canvasReleaseEvent self.+finishFeatureMoving(deltaX,deltaY) File "C:/OSGeo4W/apps/qgis-dev/.python/plugins\osm\map_tools\OsmMoveMT.py", line 730, in +finishFeatureMoving affected=self.dbm.moveLine(self.movFeat,deltaX,deltaY,self.snapFeat,self.snapFeatType,self.snapVertexIx) File "c:/programme/osgeo4w/apps/qgis-dev/.python/plugins\osm\OsmDatabaseManager.py", line 1401, in moveLine File "c:/programme/osgeo4w/apps/qgis-dev/.python/plugins\osm\OsmDatabaseManager.py", line 1802, in changePointStatus File "c:/programme/osgeo4w/apps/qgis-dev/.python/plugins\osm\OsmDatabaseManager.py", line 2503, in commit [[OperationalError]]: SQL logic error or missing database ... The OSM data was in a different directory than the project. Moving the OSM files to the project directory stopped the error occuring. The line move however never occurs.

Can anyone confirm this?

Maybe related to #1944, also see my comment.

Just tried it again with 1.6.0 (and trunk) and it generated this Python error with version 0.5 of the [[OpenStreetMap]] plugin.

An error has occured while executing Python code:

I was unable to move the line.

When trying to insert a point there was a similar error generated

The new OpenStreetMap support coming in 2.0 does not allow editing and uploading of OSM data. The current plugin with editing support has been removed.
