

QGIS Application - Bug report #21581

Incorrect dimensions of geotiff metadata/information panel

2019-03-14 11:22 AM - Hugo Hartmann

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Rasters	
Affected QGIS version:	3.6.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29397
Description		
<p>Hello,</p> <p>I attached a geotiff file. When I run gdalinfo, it gives me the correct size (612x612). However, when I import this geotiff in QGIS, and inspect the information (see screenshot attached), then the size is 613x611. . I'm not sure if this is just some weird rounding issue and if is actually displayed correctly, or if there's a deeper problem.</p>		

History

- #1 - 2019-03-14 12:32 PM - Giovanni Manghi
- Operating System deleted (Windows 10)
 - Category changed from GDAL Tools to Rasters
 - Subject changed from Incorrect dimensions geotiff to Incorrect dimensions of geotiff metadata/information panel
