QGIS Application - Bug report #216
spit plugin needs GEOS headers

2006-07-31 09:36 AM - kyngchaos-kyngchaos-com -

Status:	Closed		
Priority:	Low		
Assignee:	Gary Sherman		
Category:	Build/Install		
Affected QGIS version:		**Regression?:**	No
Operating System:	OS X	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	10275

Description

I have the various library dependencies isolated in separate folders. In building the spit plugin, it couldn't find geos.h. I added $(GEOS_CFLAGS) to spitplugin_la_CXXFLAGS in src/plugins/spit/makefile to get it to build.

- Resolution set to fixed

- Status changed from Open to Closed

This is probably necessary when the geos includes are in a different directory to the gdal include files. Change applied in SVN commit:0c3951be (SVN r5655).
