Affected QGIS version:	3.4.5		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	29418

Description

With QGIS 3.4.5-1 (89ee6f6e23) on Windows 7 64 bit, when a file vector layer is added to a map (whether drag'n'dropped or by the Data Source Manager, but not by the Browser panel), the message bar incorrectly displays "Remote layer : loading [file_name], please wait ..." info message.

Probably introduced with PR 9108 backporting PR 8985 to 3.4.

yep, seems harmless, but also is a bit confusing.

#2 - 2019-03-17 08:10 PM - Giovanni Manghi

On 3.6 does not show.
