**Description**

**User Feedback**

We are digitizing sidewalk features. This crash occurred while trying to delete point and line features that are pulling from a PostGIS database. This is the second time QGIS 3.6 has crashed while editing/digitizing in the past 3 hours, and it also happened once yesterday from a different pc. Thanks and hopefully this big report helps! :)

**Report Details**

**Crash ID:** 58554dad223893be6bb8fc0d3cc6a68df705c938

**Stack Trace**

**QGIS Info**  
QGIS Version: 3.6.0-Noosa  
QGIS code revision: commit:58734527ab  
Compiled against Qt: 5.11.2  
Running against Qt: 5.11.2  
Compiled against GDAL: 2.4.0  
Running against GDAL: 2.4.0

**System Info**  
CPU Type: x86\_64  
Kernel Type: winnt  
Kernel Version: 10.0.17134
