

QGIS Application - Feature request #21646

Results & Processing History tie-in

2019-03-21 04:38 PM - Brett Carlock

Status:	Open	Resolution: Copied to github as #: 29462
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>I think that it'd be beneficial to have the Results and Processing History panels combined as they are related to one another, and having them display together makes a lot of sense.</p> <p>Perhaps more horizontal separators could be added to the Results Viewer panel to combine the functionality of the two items together, or something else to make it so one could have one place to easily view past results/analyses and easily recall them.</p>
