

## QGIS Application - Bug report #21653

### unexpected error in nodetool

2019-03-22 10:42 AM - Peter Márton

<b>Status:</b>	Feedback	
<b>Priority:</b>	High	
<b>Assignee:</b>		
<b>Category:</b>	Digitising	
<b>Affected QGIS version:</b>	3.4.5	<b>Regression?:</b> No
<b>Operating System:</b>	Windows 10, 64byte	<b>Easy fix?:</b> No
<b>Pull Request or Patch applied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	Yes	<b>Copied to github as #:</b> 29469
<b>Description</b>		
<p>Create New Shapefile - I started to create new point layer. I activated "Vertex Tool" Current Layer option. I started digitizing - snapping options. After clicking to my map, I receive error message - unexpected error. It was necessary restart QGIS. But after this, I received this message when again modifying point layer or other new layer. I tried to create new project - again this error. I tried to restart computer - same error.</p> <p>Operation system - Windows 10, 64byte</p>		

#### History

##### #1 - 2019-03-22 11:48 AM - Giovanni Manghi

- Operating System changed from Operation system - Windows 10, 64byte to Windows 10, 64byte
- Status changed from Open to Feedback

Please try on new/clean (QGIS) profile, no 3rd party plugins installed. If possible also change the subject to something more descriptive, thanks!

##### #2 - 2019-03-22 02:38 PM - Jürgen Fischer

- Subject changed from QGIS 3.4.5 LTR to unexpected error in nodetool
