

QGIS Application - Bug report #21704

algorithm "Eliminate selected polygons" works only with the result format "memory layer"

2019-03-29 03:59 PM - Thomas Kneissl

Status:	Open	
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/QGIS	
Affected QGIS version:	3.4.3	Regression?: No
Operating System:	Win10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29520
Description		
<p>I try to merge a few selected polygons with their neighbors using the tool "Eliminate selected polygons" (with mode "Largest Common Boundary"). This works perfectly as long as I use a memory layer as result. If I want to write the result in a file the polygons don't get merged (the result looks exactly like the input).</p>

Might be an indicator for something not related to the algorithm itself, but the whole Processing output file management. I will work on it
