

QGIS Application - Bug report #2172

Crash when classifying with 'graduated' renderer

2009-12-01 06:45 PM - springmeyer -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Symbology	
Affected QGIS version:		Regression?: No
Operating System:	Linux	Easy fix?: No
Pull Request or Patch supplied:		Resolution: worksforme
Crashes QGIS or corrupts data:		Copied to github as #: 12232
Description		
To replicate:		
1) New project, load polygon shapefile (I used 'polys.shp' from qgis test data		
2) Layer Properties, turn on "New Symbology"		
3) Choose 'Graduated'		
4) Hit classify, crash....

- *Status changed from Open to Closed*

There is no such shape in the qgis sample dataset, but I found one in the qgis-mapper svn that seems the one that was used.

I cannot reproduce the problem on both linux and windows using the latest svn code (commit:f2c0df21 (SVN r12308)) on both platforms.

Give it a try again, and then if the problem persist please attach the actual shape is giving you problems. Will reopen if necessary.
