

QGIS Application - Bug report #21735

WMS Client: GetFeatureInfo in JSON format doesn't display numeric attribute values

2019-04-02 02:22 PM - Andreas Neumann

Status:	Closed	
Priority:	Normal	
Assignee:	Alessandro Pasotti	
Category:	Web Services clients/WMS	
Affected QGIS version:	3.7(master)	Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch applied:	Yes	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 29550
Description		
When doing a GetFeatureInfo request on the service https://services.geo.zg.ch/ows/Gebaeudebrueter and choosing "feature" (application/json) as format, all numeric values are not shown. Potentially, other data types might also be affected (haven't tested boolean or other data types). Click on a point feature and switch between the formats. Numeric attribute values (e.g. "AnzahlNistkästen", "bfs_nr", "Postleitzahl", etc.) are displayed fine in text and html format, but not when choosing JSON/Geojson as format. Note that in HTML and Text format, numeric values are displayed, correctly, but in JSON format (Format=Feature) all numeric values are omitted. See screenshots attached. Here is the corresponding manual request: <pre>https://services.geo.zg.ch/ows/Gebaeudebrueter?SERVICE=WMS&VERSION=1.3.0&REQUEST=GetFeatureInfo&BBOX=2682488,1222987,2683185,1223726&CRS=EPSG:2056&WIDTH=899&HEIGHT=952&LAYERS=zg.geaeudebrueter&STYLES=&FORMAT=image/png&QUERY_LAYERS=zg.geaeudebrueter&INFO_FORMAT=application/json&I=312&J=362&FEATURE_COUNT=10?&=10</pre>

Hi,

I tested the PR and it works fine!

Thanks a lot,
Andreas

#4 - 2019-04-27 06:25 PM - Alessandro Pasotti

- Status changed from In Progress to Closed
- % Done changed from 0 to 100

Applied in changeset commit:qgis|c87833c807aed321f06e3cb4900315952b439398.
