Category:	Project Loading/Saving	
Pull Request or Patch supplied:	No	Resolution:
Easy fix?:	No	Copied to github as #: 29576
Description		
<p>I'd like to see this panel have both automated entries (user-initiated saves) as well as the current manual notes that can be added.</p> <p>Furthermore, some metadata for each entry would be useful, like datetime of add for the note (autofill, but allow manual entry/override), as well as username (autofill, but allow manual entry). Also, possible column for "reason" or similar would be useful as well.</p> <p>I'd also like to see every entry in this panel be callable with a variable so they can be used on document layouts to populate something like an edit history/document pedigree, if needed.</p>
