Have you followed the instructions here? <https://gitlab.orfeo-toolbox.org/orfeotoolbox/qgis-otb-plugin>

Hi, thx, I managed to fully install OTB on my MAC and it is now fully functional. However, the error shown above remains and it is very annoying because it shows up every time I open the plugins manager ! I think, it is from the first time that I tried to installed OTB and followed the wrong instructions. Any idea how to delete that error ? thx again

you have a very "funny" name for your otb repo connection, maybe is the source of the problem?
