QGIS Application - Bug report #21833

Topological editing now working when the data CRS is different from project CRS

2019-04-11 10:10 AM - Sabin Kolarov

Status: Open Priority: High

Category: Digitising

Affected QGIS version:3.6.1Regression?:YesOperating System:Easy fix?:No

Pull Request or Patch supplied: Resolution:

Crashes QGIS or corrupts data: Copied to github as #: 29648

Description

When the data CRS is different from project CRS the Topological Editing mode is not working. It is selecting only the vertex of the current line.

When data CRS and project CRS are the same, the tool works correctly.

This bug was introduced in 3.4.5 and is also in 3.6.1.

History

#1 - 2019-04-11 08:16 PM - Giovanni Manghi

- Regression? changed from No to Yes
- Operating System deleted (Windows 10)
- Affected QGIS version changed from 3.4.6 to 3.6.1
- Category changed from Editing to Digitising

Confirmed here also on Linux, pretty severe regression.
