

## QGIS Application - Bug report #21843

### Atlas coverage layer saved with absolute path when project is set to relative save paths

2019-04-12 11:21 PM - Johannes Kroeger

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Map Composer/Printing	
<b>Affected QGIS version:</b>	3.7(master)	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 29658
<b>Description</b>		
<p>The setup:</p> <ul style="list-style-type: none"><li>- A QGIS project with a Print Layout.</li><li>- "Save paths" in the project's settings is set to "relative"</li></ul> <p>The qgz file includes the following snippet with an absolute path to a layer:</p> <pre>&lt;Atlas sortFeatures="0" enabled="1" hideCoverage="0" coverageLayer="1555062671232_cdc7c829_6e4d_4938_a006_b8882c376abf" coverageLayerSource="/tmp/some/path/1555062671232.geojson" coverageLayerProvider="ogr" filterFeatures="0" coverageLayerName="1555062671232" filenamePattern="output_'   pad(@atlas_featurenumber, 4, 0)" pageNameExpression=""/&gt;</pre> <p>This is a privacy issue and should not be happening.</p> <p>Atlas coverage layer paths should be save relative if the project is set up that way.</p>
