

## QGIS Application - Bug report #21846

### Crash while closing QGIS

2019-04-14 05:47 PM - Marc Struelens

<b>Status:</b>	Feedback	
<b>Priority:</b>	High	
<b>Assignee:</b>		
<b>Category:</b>	Unknown	
<b>Affected QGIS version:</b>	3.4.6	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	Yes	<b>Copied to github as #:</b> 29661

**Description**

**User Feedback**

I was closing the application after saving different layers in a geopackage (through toolbox processing > database). It also looks that I last internet connection while closing QGIS (not because of closing QGIS).

**Report Details**

**Crash ID:** b6e374582c08a74f0b3cd4a4b10d3e831eca662a

**Stack Trace**

```
QgsSnapIndicator::~QgsSnapIndicator :
QgsMapCanvas::~QgsMapCanvas :
QgsVectorLayerProperties::'default constructor closure' :
CPLStringList::operator char const * const * :
main :
wcsprk :
RtlFreeAnsiString :
wcsprk :
LdrGetDllHandleEx :
LdrGetProcedureAddressEx :
LdrGetProcedureAddressEx :
```

**QGIS Info**

QGIS Version: 3.4.6-Madeira  
QGIS code revision: commit:cc0e375a9f  
Compiled against Qt: 5.11.2  
Running against Qt: 5.11.2  
Compiled against GDAL: 2.4.1  
Running against GDAL: 2.4.1

**System Info**

CPU Type: x86\_64  
Kernel Type: winnt  
Kernel Version: 6.1.7601

### History

#### #1 - 2019-04-14 08:52 PM - Giovanni Manghi

- Crashes QGIS or corrupts data changed from No to Yes
- Status changed from Open to Feedback
- Priority changed from Normal to High

Does it happens always? is what a one time thing? can you try with a new/clean qgis profile (no 3rd party plugins installed)?

## #2 - 2019-04-16 07:38 AM - Marc Struelens

- File Knipsel.PNG added

It just happened again...

When closing a project, it crashes sometimes but not always.

I can't try a new/clean qgis because of no administrator rights to change.

But 3.4 was properly installed last week, in other words it is fairly new and clean. Not many plug-ins are installed (see attachment)

## Report Details

---

**Crash ID:** e481d20e3a0db3f1afd351ee5b0f09a6d5e30f25

### Stack Trace

```
pj_init_plus_ctx :
pj_init_plus_ctx :
QgsCoordinateTransform::transformPolygon :
QgsCoordinateTransform::transformPolygon :
QgsCoordinateTransform::addToCache :
QHashData::free_helper :
QgsCoordinateTransform::addToCache :
QgsCoordinateTransform::invalidateCache :
QgisApp::~QgisApp :
CPLStringList::operator char const * const * :
main :
wccspbrk :
```

qgis profiles are in the (system) user folder, so you don't need elevated privileges to add/remove them.

## #4 - 2019-04-16 05:08 PM - Marc Struelens

Could you explain me more in detail? It's not about just removing the plug-ins I assume?

Do you have a link with explanation? I am not the big QGIS expert...

It crashed once again

Do you have a link with explanation? I am not the big QGIS expert...

settings > user profiles > new profile

then do not install any 3rd party plugin and see if is still crashy.
