

QGIS Application - Bug report #21855

Bad Allocation - Report Composer

2019-04-15 09:48 PM - Tomás Carvalho

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	3.6.0	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29670
Description		
<p>I'm trying to export a Report document in PDF and some times it works well.</p> <p>But some times it causes 'Bad Allocation' and the final PDF archive get much more size and the QGIS stops working.</p> <p>I have already try to limit the number of features and pages to show but still doesn't work.</p> <p>What could be?</p> <p>Please send me any kind of resolution to this problem.</p>		

History

#1 - 2019-04-15 11:45 PM - Giovanni Manghi

- Assignee deleted (Tomás Carvalho)
- Category changed from Actions to Map Composer/Printing
- Status changed from Open to Feedback
- Resolution deleted (not reproducible)

can you share the project and data?

#2 - 2019-04-16 02:01 PM - Tomás Carvalho

- File QGIS_Data.zip added
- File QGIS_Project.zip added
- Assignee set to Tomás Carvalho

Of course

I am using 18 unique pages for this report that will be multiplied to 116 municipalities (2,088 pages).

I was doing an MVP with only 3 of them (54 pages)

#3 - 2019-04-16 02:13 PM - Giovanni Manghi

- Operating System changed from Windowns 10 to Windows 10
- Assignee deleted (Tomás Carvalho)

the project does not open in clean way, there are a lot of missing postgis and shapefiles layers. Not sure how the attached shapes are related to the attached project.

#4 - 2019-04-16 03:59 PM - Tomás Carvalho

- File *project.qgz* added
- File *Data_bugReport.zip* added
- File *Data_bugReport2.zip* added
- File *Data_bugReport3.zip* added
- File *metadata_bugReport.txt* added

Apologize for that.

Now I send data, project and metadata

sorry for bugging, the project still does not open in a clean way (even after unzipping everything you attached), still points to postgis layers and to local drives (D, X). What would be ideal is a (zipped) folder that contains the project and the data necessary to allow us (try) replicate this issue.

#6 - 2019-04-16 08:36 PM - Tomás Carvalho

OK I understand, but the maximum size is limited here.

So, I put all files on this we transfer link: <https://we.tl/t-l8vUF7I4s6>

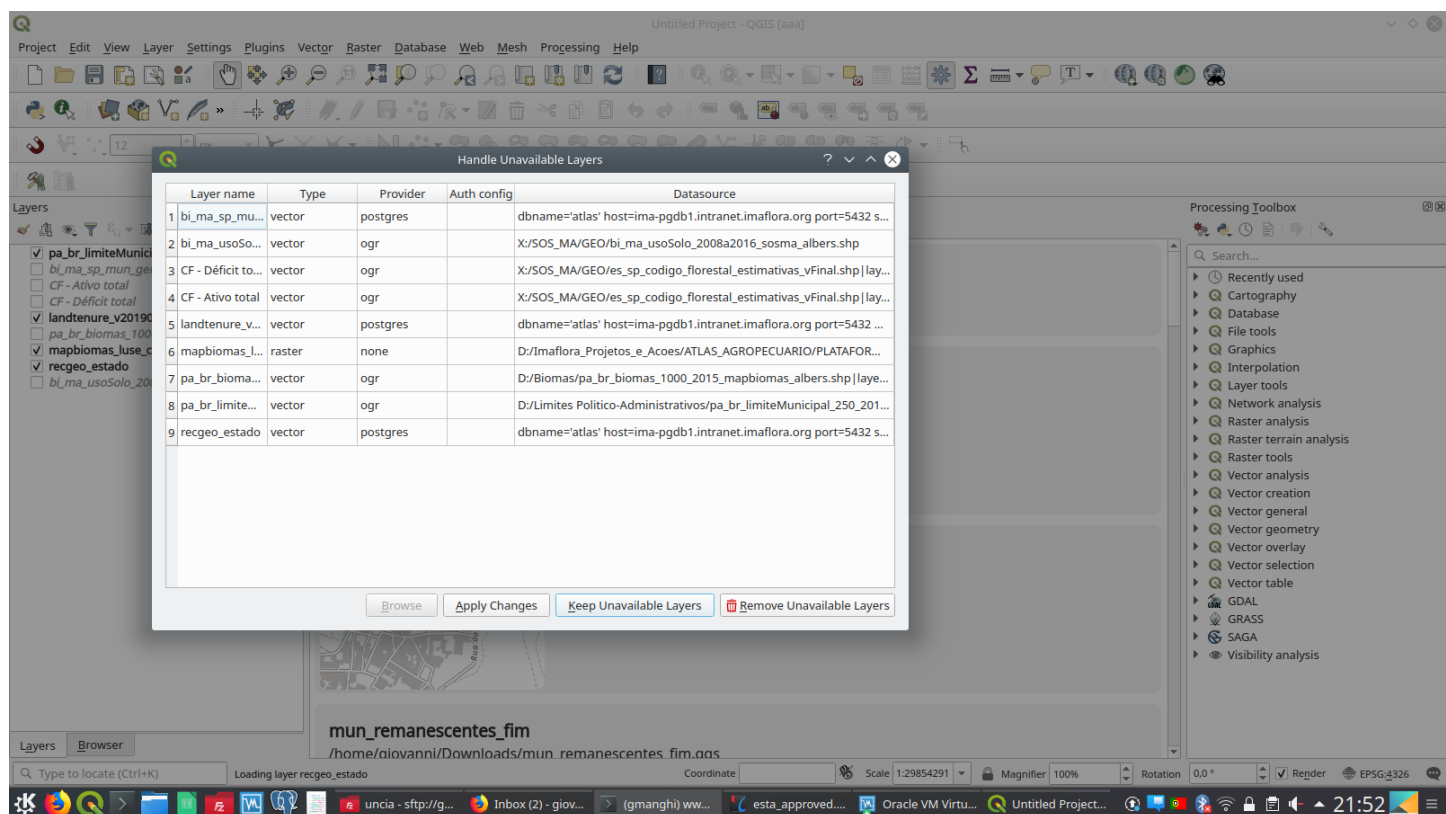

Now see if it can be seen

#7 - 2019-04-16 10:54 PM - Giovanni Manghi
