

QGIS Application - Bug report #2186

"New Symbolology" button logic is backwards

2009-12-03 04:25 AM - barryrowlingson -

Status:	Closed	
Priority:	Low	
Assignee:	Martin Dobias	
Category:	Symbolology	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 12246
Description		
Go to layer, properties, Symbolology pane: See the 'New symbolology' button. Click it. Message is: "Do you wish to use original symbolology implementation for this layer?" And no, I don't, I wish to use the new symbolology. So I click 'No'. But it stays on the old (original) symbolology. If I click 'Yes', I get the new symbolology pane. The dialog string should say 'Do you wish to use the new symbolology' at that point. It should probably be shorter, maybe just "Switch layer to New Symbolology"? With [Yes No] buttons. The corresponding dialog from the "New Symbolology" pane should prob say "Switch layer to Old Symbolology?" with [Yes No] buttons. On r12318.
