QGIS Application - Bug report #21893 Selected join isn't visually selected

2019-04-21 12:55 PM - Jonathan Moules

Status:	Open			
Priority:	Normal			
Assignee:	Matthias Kuhn			
Category:	GUI			
Affected QGIS version:3.4.3		Regression?:	No	
Operating System:		Easy fix?:	No	
Pull Request or Patch supplied:		Resolution:		
Crashes QGIS or corru pts data:		Copied to github as #: 29708		
Description				

If I select a Join on the Joins page of Layer Properties, it doesn't get highlighted in any way. This makes it hard to know which join you're about to edit/remove.
