

QGIS Application - Bug report #21923

the r.neighbors command does not work

2019-04-24 04:36 PM - salvatore nieddu

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Processing/GRASS	
Affected QGIS version:	3.4.4	Regression?: No
Operating System:	windows 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29738
Description the r.neighbors command (for raster analysis with floating window) does not work. There is no error message. Simply the final result is a non-result, in the sense that on the TOC a raster appears with improbable values, while on the screen no raster appears (I tried to save the temporary file but the file does not appear). I've also tried elementary rasters and different versions of QGIS, but it doesn't work in any way.
