

QGIS Application - Bug report #21966

NULL Custom Representation breaking Query Builder?

2019-05-01 08:23 PM - Brett Carlock

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Processing/GUI	
Affected QGIS version:	3.6.2	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 29781
Description		
<p>I've changed my NULL representation to be <NULL> more similarly to ESRI's software, just to help the value stand out more.</p> <p>However, when I use the Query Builder, double-clicking a result of NULL, shown in the GUI as the same as my custom representation, <NULL>, does not insert the NULL value but instead a literal string of '<NULL>'</p>
