

## QGIS Application - Bug report #21967

### NULL value inserted as literal string instead of NULL object in Query Builder interface

2019-05-01 08:24 PM - Brett Carlock

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Processing/GUI	
<b>Affected QGIS version:</b>	3.6.2	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 29782
<b>Description</b>		
Tangentially related to #21805		
Related also to #21966		
Issue: The Query Builder interface inserts certain values as literal string representations instead of the actual object type.		
STR: Double-click in the Query Builder GUI on a NULL entry will insert 'NULL', not NULL into the Query Builder.		
If you have your NULL representation changed, it will insert the string representation of that NULL representation, not the NULL object or property. So, as in Ticket #21966 above, my custom NULL representation of <NULL> will not insert the object NULL, but instead the string '<NULL>'.
