

QGIS Application - Bug report #22008

Batch processing error in r.mapcalc.simple

2019-05-07 09:11 AM - Daria Svidzinska

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Processing/Core	
Affected QGIS version:	3.6.2	Regression?: No
Operating System:	Windows 7 64 bit	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29822
Description		
I'm trying to perform batch processing for multiple rasters using a conditional expression in r.mapcalc.simple, GRASS 7.6.1. The expression is: <pre>if((A==322 A==386 A==834 A==898 A==1346)&&(B<=10000&&B>=-10000),(B*0.0001),null())</pre> where A is a qa_raster and B is a ndvi_raster. The approach works fine for a single job, but when I try to process multiple files I constantly get an error. For your convenience I attach the following files: - batch_processing_error.txt - log of batch processing with error - qgis_version_info.txt - information about QGIS version etc - test_project.zip - a test project with a couple of layers as a data example
