QGIS Application - Bug report #2201
shapefiles: problem with subset queries

2009-12-06 06:55 AM - Giovanni Manghi

Status:	Closed			
Priority:	Low			
Assignee:	nobody -			
Category:	Data Provider			
Affected QGIS version:			**Regression?:**	No
Operating System:	All		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed
Crashes QGIS or corrupts data:			**Copied to github as #:**	12261

Description

The problem seems to affect just shapefiles, not postgis nor spatialite.

Open a shapefile a create a subset trough te subset query option in "properties -> general".

Save the project and close qgis.

Reopen qgis and open the project, all the features will show, not just the queried ones.

Go to properties -> general and you will see that the query is malformed. Any try to correct it produce the message "setting the query failed".

Tested on trunk on ubuntu 9.04.

History

#1 - 2009-12-06 07:06 AM - Jürgen Fischer

can you give an example? something simple like "AREA"<1000000 didn't reproduce the problem here.

#2 - 2009-12-06 07:15 AM - Giovanni Manghi

ok,

take the spatialite sample dataset and save the layer "regions" as shapefile.

Then test a query like

"name" = 'Toscana'

#3 - 2009-12-06 08:44 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:a95aa6c7 (SVN r12342)
