

QGIS Application - Feature request #22012

Add "point on surface" to label placement options

2019-05-07 11:03 PM - Nathan Perry

Status:	Open	Resolution: Copied to github as #: 29826
Priority:	Normal	
Assignee:		
Category:	Labelling	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>In addition to label placement around a polygon's centroid, it would be helpful to have the option to use a point calculated by the <code>point_on_surface()</code> algorithm.</p> <p>See also previous feature request #3647. It was closed because of the option to "force point inside polygon". However, this option only takes effect if the centroid falls outside the polygon, whereas <code>point_on_surface()</code> actually calculates a point different than the centroid, even if located inside the polygon. This point appears more visually centered in certain polygons and is thus sometimes a better choice cartographically.</p>
