

QGIS Application - Bug report #22016

Constraint on Text Edit Widget mixes up expression and expression description, causing constraint not to work.

| Pull Request or Patch supplied: | | Resolution: duplicate |
| Crashes QGIS or corrupts data: | | Copied to github as #: 29830 |
| Description | | |
| <p>When specifying a constraint on a text field (text widget) the expression and the expression description trades places. This causes the filter not to work.</p> <p>Steps to reproduce:</p> <ol style="list-style-type: none">1. New project, new Geopackage vector with a text data column called 'name'.2. In properties, attribute form; set a constraint with expression <code>length(name) > 1</code>, and description 'At least two characters'. Click OK.3. Look in properties, attribute form. Expression and expression description has now traded places. <p>Tested on 3.6.2, Build 656500e0c4 on Windows 10, and Build 656500e on Ubuntu. A workaround is to use the expression as expression description as well.</p> | | |
