Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	29877

Description

After some tests, I think having identified the origine of the problem. I create a project with a model where there is an atlas. There is a map rotated (in "rotation" parameter which are not under the scale). There are two problems : the map is not refresh (doesn't appear) and when I try to delete the map rotated Qgis crashes.

(When there is not the rotation, the project doesn't crash)
