| **Affected QGIS version:** | 3.6.2 | **Regression?:** | No | |
| **Operating System:** | Windows 10 | **Easy fix?:** | No | |
| **Pull Request or Patch supplied:** | No | **Resolution:** | | |
| **Crashes QGIS or corrupts data:** | No | **Copied to github as #:** | 29879 | |

**Description**

In the identify window, URLs contained in attributes are displayed as links so you can click through to them. For valid file urls (starting "file:////"), the link is displayed correctly in the window, but on clicking it adds "http://" to the start of the URL which makes it incorrect.

**History**

**#1 - 2019-05-14 09:18 AM - Giovanni Manghi**

*- Easy fix? changed from Yes to No*

*- Priority changed from High to Normal*

*- Category changed from GUI to Map Tools*
