<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> wontfix
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 29888
<b>Description</b>		
<p>Hi,</p> <p>I'm trying to use the href html attribute in a map composer under Qgis 3.4.4-Madeira.</p> <p>The issue: When using code [1] and exporting my map as .pdf, the text is colorized in blue but impossible to click on it.</p> <p>When I change to code to [2], with the complete url as a "text", then it works. I provide an output showing this issue.</p> <p>I don't know it has already been reported and/or still exists in more recent versions.</p> <p>[1] <code>&lt;a href="https://www.w3schools.com/tags/att_a_href.asp" target="_blank"&gt; Click here to see how to use HREF&lt;/a&gt; &lt;br/&gt;</code></p> <p>[2] <code>&lt;a href="https://www.w3schools.com/tags/att_a_href.asp" target="_blank"&gt; <a href="https://www.w3schools.com/tags/att_a_href.asp&amp;lt;/a&gt;">https://www.w3schools.com/tags/att_a_href.asp&amp;lt;/a&gt;</a> &lt;br/&gt;</code></p>		

#### History

#1 - 2019-05-20 02:57 PM - Alessandro Pasotti

- Resolution set to wontfix

- Status changed from Open to Closed

They are both not clickable to me.

I'm sorry but think this is a won't fix because of how the underlying libraries (QT) export data to PDF.

There is some ongoing work to support geopdf output but I don't know if that will be a game changer for this particular issue.
