QGIS Application - Bug report #22104
zonal histogram wrong

2019-05-20 11:42 AM - yonghyun kim

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	Processing/QGIS		
Affected QGIS version:	3.4.8	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:		**Copied to github as #:**	29917

Description

The zonal histogram is not generated by the raster band setting and the raster value is listed as the field value of the output.

For example,

the raster band type is singleband pseudocolor,

rast value range = 0 ~ 100

band is classified by 5 (20, 40, 60, 80 ,100)

But oustput is stragne like below

HISTO_10   int8   1 0

HISTO_10.0033   int8   -1 0

HISTO_10.004   int8   -1 0

HISTO_10.0041   int8   -1 0

....

HISTO_100.0   int8   -1 0

Is it normal output?

I expect this function is same zonal histtogram in Arcgis

History

#1 - 2019-05-21 10:47 AM - Giovanni Manghi

- Category changed from Rasters to Processing/QGIS

- Subject changed from zonal histogram something wrong to zonal histogram wrong
