Crashes QGIS or corrupts data:	Copied to github as #: 29927
Description	
<p>Hi,</p> <p>Since yesterday, all menus and tables are magnified in QGIS. I tried uninstalling and reinstalling the application but that didn't solve the issue. I'm using the 3.6.2 version and didn't have this issue before updating to this version.</p> <p>I would appreciate if someone can help me with this.</p> <p>Thanks.</p>
